Kuali Curriculum & Catalog Management

Kuali's flexible, cloud-based software-as-a-service (SaaS) provides access to a streamlined, accessible, sustainable, and resilient solution for colleges and universities to effectively manage the holistic curriculum process. Kuali Curriculum and Catalog Management includes a modern interface and intuitive experience and is configurable by institution.

Next Generation Smart Forms

Flexible forms configurable for institution-designated content types
(ex: courses, programs, etc.)

Graphical Workflows

Collaborative, visually appealing workflows with drag and drop interface for reviews, assessments, and approvals.

Dependency Analysis

Transformative transparency into your institution's curriculum ecosystem including dependencies and relationships.

Dynamically Build Catalog

Automated, data-centered approach with seamless integration leveraging approved curriculum to build catalog (i.e. policy manuals, handbooks).

Broad & Inclusive Access

Accessible, on-demand responsive design publishing for use across devices (desktop, laptop, mobile, tablet) and print-ready PDF (accreditation, veterans affairs, preference).

Personalized Dashboards & Reports

Tailored user-journey and robust reporting to gain insight with data.

Single Sign On (SSO) & Permissions

Secure sign-on with existing username/password and role-based permissions.

REST API

Comprehensive APIs to easily retrieve and manage data.

SIS Connector

Agile to connect with student information systems (SISs) and other 3rd party applications.

Implement curriculum first to dynamically build catalog, publish on-demand for broad and intuitive access, and integrate with desired systems. Maintain data integrity and continue producing high quality curriculum on your path to student success in collaborative partnership with Kuali.
