kuali

KUALI BUILD VS FREVVO

Kuali Build and Frevvo specialize in no-code forms & workflow automation but approach the solution differently.

Check them out side-by-side to see which meets your needs.

OVERVIEW

kuali BUILD
Streamline approvals with powerful integrated digital forms and automated workflows. No programming needed.

frevvo
Design forms and workflows, setup business logic, and deploy automated solutions with moderate IT support.

IT SUPPORT

✅ **MINIMAL**
IT will setup identity management and integrations. Following, anyone can create powerful forms with no technical knowledge required.

⚠️ **MAXIMUM**
Business developers or IT support should plan to primarily manage all business apps.

FEATURES

Robust feature set offering forms and workflow features into integrated campus apps complete with reportable data.

Extensive feature set with forms and workflow capabilities, reporting, and mobile-ready applications.

REVIEWS

★★★★★
Davidson College | June 2020
JD Mills, Manager, Digital Transformation
As soon as we saw Kuali Build, we knew we had found what we were looking for – something that could solve for 90% of our low code use cases, while being completely accessible to our end users.

★★★★★
Vince Kellen, CIO, UC San Diego | October 2019
Adopting Kuali's approach allows us to enable more people, more business users, to create their own solutions. This increases the capacity of IT while still providing a standard of excellence that connects people with each other through unified practices.

★★½☆☆
University, > 1,000 employees | October 2018
Frevvo rolled out at our University in order to create a workflow for research proposal approval. I like that admins can have access to reassign tasks, reject tasks, and leave notes in the form. I dislike that the reporting is extremely limited and the search options are very rudimentary.

★★★★★
University, < 500 employees | August 2019
For applications that require the coordination of effort characterized as workflows, Frevvo, has allowed us to reduce custom application development of systems that manage task steps, emails taskers, and tracks information and authorization flows.

PRICING

Starting at:
$850
per month

Three-tier model scaling with institution full-time employees. Plans vary on included builders and apps. Unlimited workflows and submissions.

Starting at:
$260
per month

Usage-based model (for Cloud). Includes upfront form submission quantities. Model includes overages and transaction throttling.

SHOULD YOU USE THESE PRODUCTS TOGETHER AS PART OF A TECHNOLOGY PORTFOLIO?

❌ **NOT RECOMMENDED**

ADVICE

CONSIDER BUILD WHEN...
Anyone in your institution needs to create secure, scalable form-based processes that have multi-step approval processes across campus.

Build boasts an extensive feature set accessible to be utilized by any staff or faculty member with no IT support required.

CONSIDER FREVVO WHEN...
You need to build very few non-mission-critical forms with limited form submissions and IT has bandwidth and desire to support.

We do not recommend using Frevvo to empower staff across campus as the product, while robust on paper, offers a very poor user experience for non-technical business users.
