KUALI BUILD | ADOBE SIGN | DOCUSIGN

Kuali Build, Adobe Sign, and DocuSign capture and track approvals, but each product does so differently and excels under different circumstances.

Check them out side-by-side to see which meets your needs.

OVERVIEW

kuali BUILD
Streamline approvals with powerful integrated digital forms and automated workflows. No programming needed.

Adobe Sign
Collect e-signatures, create automated workflows, and use out-of-the-box integration with Adobe Acrobat DC.

DocuSign
Empower organizations to connect and automate how they prepare, sign, act on, and manage agreements.

REVIEWS

★★★★★
JD Mills, Manager of Digital Transformation Davidson College | June 2020
As soon as we saw Kuali Build, we knew we had found what we were looking for – something that could solve for 90% of our low code use cases, while being completely accessible to our end users.

★★★★★
Vince Kellen, CIO, UC San Diego | October 2019
Adopting Kuali's approach allows us to enable more people, more business users, to create their own solutions. This increases the capacity of IT while still providing a standard of excellence that connects people with each other through unified practices."

★★★★½
University, > 1,000 employees | May 2019
The best feature about Adobe Sign that I like is the ability to create documents and email them out for signatures. One thing that I dislike about Adobe sign is that creating the document can sometimes be confusing and complicated.

★★½☆☆
University, < 1,000 employees | July 2020
The best feature about Adobe Sign is that I can type signatures with various font selections. The UI is not attactive and it has too many settings options.

★★★½☆
University, > 1,000 employees | July 2020
We have two enterprise eSignature platforms in use. DocuSign is considered the easiest to use and the easiest to administer. Customization and enhancements to the product are a bit slow to come out from the enterprise perspective. Feature requests often go without a response.

★★★★★
University, < 1,000 employees | July 2020
I love the ease of sending documents around the large college campus where I work to collect signatures that would otherwise be impossible to track down.

PRICING

Kuali Build
Starting at:
$850
per month
Three-tier model scaling with institution full-time employees. Plans vary on included builders and apps. Unlimited submissions and feature use.

Adobe Sign
Starting at:

DocuSign
Starting at:
$1,000
per month
Pricing-model features Higher Ed site license starting at <250 FTE with unlimited usage. Plans vary with users and usage restrictions.

ADVICE

SHOULD YOU USE THESE PRODUCTS WITH KUALI BUILD AS PART OF A TECHNOLOGY PORTFOLIO?

YES!

CONSIDER BUILD WHEN...
Your team needs to create rich form-based processes that involve data from existing campus systems, have multi-step approval processes, or could be improved with optimized data analysis and reporting capabilities.

Example processes include a Change of Major Request, Fellowship Application, or Purchase Order Request.

CONSIDER ADOBE WHEN...
Your team needs to collect legally verifiable signatures on existing PDF files with very simple approval processes.

Example files include Work Authorizations, Release of Information, Enrollment Verification or Permission Slips.

CONSIDER DOCUSIGN WHEN...
Your team needs to collect legally verifiable signatures on existing contracts/agreements with very simple approval processes.

Example files include Work Authorizations, Release of Information, Enrollment Verification or Permission Slips.
