## STUDENT

### TRANSFORM PROCESSES. ELEVATE IMPACT.

A modular suite of SaaS solutions designed for registrars, admissions officers, and curriculum managers in higher education.

Tailor your Kuali Student modular suite to fit your institution's unique needs and be confident it will grow with you.

### Modules Designed With You In Mind

**Curriculum Management**

**Build for Registrars & Admissions Officers**

**Catalog Management**

**Syllabus Management**

## Curriculum Management

Kuali Curriculum Management supports efficient existing curriculum processes and approvals while connecting with campus systems using tight integrations to ensure accurate, up-to-date information everywhere it is needed without duplicate data entry. Configurable forms and workflows, agendas, and robust reporting are just a few ways Kuali Curriculum Management supports your curriculum process and accreditation while providing all users with an easy-to-use solution.

## Catalog Management

Kuali Catalog Management dynamically builds an accurate, up-to-date, accessible catalog directly from Kuali Curriculum Management reducing the time spent creating the catalog. Additionally, Kuali Catalog Management supports accreditation requirements through addendums, organized historical records, multiple output types (i.e. HTML, PDF), and more.

## Build for Provosts, Registrars & Admissions Officers

Kuali Build for Registrars and Admissions Officers digitally transforms student and faculty-facing forms and processes. FERPA compliant and easy-to-use, Build for Registrars and Admissions Officers provides the opportunity to refocus your efforts on more hands-on but equally important tasks while providing an intuitive digital experience to students, faculty, and staff.

## Syllabus Management

Kuali Syllabus Management helps manage section/offering level class syllabus. Kuali Student is currently working on a pilot with institutions for this module. Kuali was born out of the higher ed community. We partner tightly with institutions to develop new modules. We built the Curriculum Management module and rolled out a pilot with the University of Toronto and Coventry University. We built the Catalog module and rolled out a pilot with Southern New Hampshire University (SNHU) and Brigham Young University Idaho (BYUI). If you are interested in learning more about this module and pilot opportunity, please contact us via email at [experience@kuali.co](mailto:experience@kuali.co).

### Built In Partnership

### A Word From One of Our Partners

“Looking at other products and comparing Kuali...Kuali really stood out as being easy to navigate, customizable, and we could keep our processes...with some other solutions we would have had to change our processes to fit the technology and we wanted the technology to fit our processes. Kuali allowed for that. After demoing all options, the committee decision was unanimous to go with Kuali.”

**Ashley Rogers, Assistant Registrar, Curriculum Management**  
**Murray State University**
