REVIEWS

★★★★★
*JD Mills, Manager of Digital Transformation
Davidson College | June 2020*
As soon as we saw Kuali Build, we knew we had found what we were looking for – something that could solve for 90% of our low code use cases, while being completely accessible to our end users.

★★★★★
Vince Kellen, CIO, UC San Diego | October 2019
Adopting Kuali's approach allows us to enable more people, more business users, to create their own solutions. This increases the capacity of IT while still providing a standard of excellence that connects people with each other through unified practices."

★★★★☆
University, > 1,000 employees | July 2020
I love the ease of creating a form. I appreciate the opportunity to provide details for specialized emails and forms to each stakeholder. (I am) struggling with learning how to create a process design. It takes practice and good training from an experienced Laserfiche user to fully grasp how to design a process.

★★★★☆
University, < 1,000 employees | July 2020
The best thing, for me, about Laserfiche has been the ability to route forms or documents from person to person in different locations without needing to wait for mail delivery or a courier. I dislike that customizing forms requires a bit of coding.

PRICING

Starting at:
$850
per month

Three-tier model scaling with institution full-time employees. Plans vary on included builders and apps. Unlimited submissions and feature use.

Starting at:
$54
per user / month

Pricing-model is combination of user and usage based with add-ons for external form submissions, external document sharing, API-access and more.

ADVICE

SHOULD YOU USE THESE PRODUCTS TOGETHER AS PART OF A TECHNOLOGY PORTFOLIO?

✓ **YES!**

CONSIDER BUILD WHEN...
Your team needs to create rich form-based processes that involve data from existing campus systems, have multi-step approval processes, or could be improved with optimized data analysis and reporting capabilities.

Example processes include a Change of Major Request, Fellowship Application, or Purchase Order Request.

CONSIDER LASERFICHE WHEN...
Your team has IT support readily available, extensive budget for a per-user-based solution and needs an extensive document and records management solution complete with process automation capabilities.

Example use cases include storing, automating and archiving HR onboarding files.
